

Section 2.3

Graphical Misrepresentations of Data

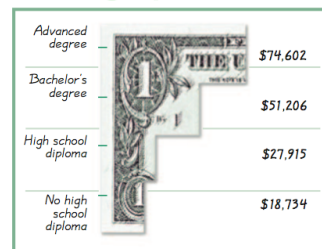

Objective

1. Describe what can make a graph misleading or deceptive

Year, x	Life Expectancy, y
1950	68.2
1960	69.7
1970	70.8
1980	73.7
1990	75.4
2000	77.0

Pictographs

Bars have same width, too busy, too difficult to understand.

Figure E: How statistics can be misleading
